

SAMplicity 365 Overview

Microsoft 365 has become the de-facto standard for office applications. However, most organisations are failing to get the maximum return on their investment against an extensive range of subscriptions. In tests, many organisations can obtain up to 50% improvement on usage/efficiency.

Whilst compliance is less of a worry with SaaS (Software as a Service), over-provision is now the greatest risk with regards to SAM. With our SAMplicity 365 service, you can quickly identify:

- ❖ Unused/inactive accounts for re-harvest/true-down
- ❖ Subscribers aligned with the wrong subscription/suite
- ❖ Duplicate user provisions against multiple tenancies
- ❖ Poor product adoption across the business
- ❖ Training requirements for users not using full functionality

We have several out-the-box options to choose from, but we're flexible and the service can be scaled to your needs, so don't hesitate to get in touch and we can tailor a package to suit you:

	Lite (it's FREE)	Standard	Pro	Premium
Efficiency benchmark chart	✓	✓	✓	✓
Inactive usage tracking	✓	✓	✓	✓
